

Flower Basket Weaving

Implementation

1. Turn the cup upside down and make seven vertical cuts from the bottom toward the top to create seven strips of roughly equal size (leave 1-2 cm uncut at the top).

2. Flip the paper cup over, bend the strips down and pull a bit of twine between two strips into the centre. While rotating the cup, weave the twine over one strip, under the next one, over the following one and so on.

3. As you weave the twine, wrap your hand around the bottom of the cup, pushing the strips up towards the centre like a pot. Continue until you finish covering the entire cup, then tuck the end into the woven twine in the cup.

4. Add flowers and decorate flower basket with stickers if you like.
