

# Nature Stationery Instructions

1. Rip 1–3 holes in the paper, then add packing tape/contact paper over the hole on the reverse side of the paper to create a window (tape outlined below)

2. Flip the paper over and add pieces of nature to the sticky window

3. Cover the front of the window with another piece of packing tape/contact paper. Repeat if you want to add more nature windows (like below), then write a letter or journal entry.
